Practice workbook · Draw or label a human cell as seen under the microscope

Labelling given diagrams of human cells, naming lettered parts, naming a missing organelle, or drawing a labelled cheek cell.

6 question parts: 1 worked-example retry and 5 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

Type ID: HBI-DRAW-LABEL-ANIMAL-CELL

1. Question 2 · part a · 4 marks

November 2023 Paper 2

Worked-example retry · Attempt part a only.

2 (a) Draw a labelled diagram of a cheek cell from inside a mouth as seen under a light microscope.

(4)

OLevels.com SCHOOL

(b) (i) Explain what is meant by the term **tissue**.

(3)

(ii) State the type of tissue that contains cheek cells.

(1)

(iii) Name two other types of tissue.

(2)

1 .....

2 .....

(Total for Question 2 = 10 marks)

2. Question 2 · part a.i · 3 marks

November 2020 Paper 1R

Further practice · Attempt part a.i only.

2 The diagram shows a cell from the human breathing system.

(a) (i) Add these labels to the diagram.

- cilia
- cell membrane
- nucleus

(3)

(ii) Each of the cell structures has a particular function.

The boxes give a list of structures and functions.

Draw one straight line from each structure to its function.

(3)

Structure	Function
cilia	holds the genetic code
cell membrane	site where most chemical reactions occur
nucleus	controls the entry and exit of substances
	makes proteins
	moves mucus through the trachea

3. Question 8 · part a.i · 1 mark

November 2020 Paper 1

Further practice · Attempt part a.i only.

8 (a) The diagram shows the nucleus of a cell.

(i) Name the structures labelled P.

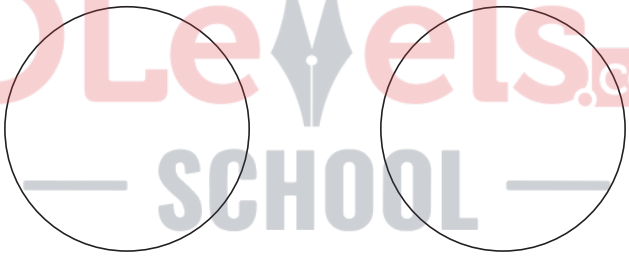

(1)

.....

(ii) The cell divides by mitosis and two nuclei are produced.

Draw the appearance of the two nuclei.

(2)

(b) Before mitosis can occur, the DNA of the cell must replicate.

The table lists stages of DNA replication.

Write the numbers 1, 2, 3 and 4 in the boxes to show these stages in the correct order.

(1)

Stage	Number
complementary bases pair up	
DNA double helix unwinds	
strands separate	
two DNA helices form
