Block practice · Respiration

Work through each question type in order. Each section has a worked-example retry and all further practice. Attempt only the part outlined in red.

Write or complete the respiration equations

Explain how respiration releases energy and ATP transfers it

Set up and explain the indicator practical comparing carbon dioxide in breath

OLevels.com SCHOOL

Practice workbook · Write or complete the respiration equations

Word and balanced symbol equations for aerobic respiration and the word equation for anaerobic respiration in humans.

9 question parts: 1 worked-example retry and 8 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

5. Question 4 · part a.i · 3 marks

June 2024 Paper 1

Further practice · Attempt part a.i only.

4 (a) The diagram shows some scientific equipment.

(i) Draw a diagram to show how this equipment is set up to investigate the difference between the carbon dioxide concentration of inspired air and of expired air.

5. Question 4 · part a.i · 3 marks

June 2024 Paper 1

Further practice · Attempt part a.i only.

(ii) State one safety precaution in this investigation.

(1)

(b) A student investigates their breathing rate at rest, after gentle exercise and again after vigorous exercise.

The student repeats each exercise three times.

The student's mean results are shown in the table.

Mean breathing rate in breaths per minute		
at rest	**after gentle exercise**	**after vigorous exercise**
14	19	50

(i) Give one control variable in this investigation.

(1)

(ii) Explain how the breathing rate after vigorous exercise benefits working muscles.

(4)

(Total for Question 4 = 9 marks)

6. Question 7 · part a.iii · 2 marks

June 2024 Paper 2R

Further practice · Attempt part a.iii only.

7 (a) Aerobic and anaerobic respiration both take place during exercise.

(i) Give the word equation for anaerobic respiration.

(1)

.....

(ii) Complete and balance the chemical symbol equation for aerobic respiration.

(2)

$C_6H_{12}O_6$ + ... ⟶ ..... + ... CO_2

(iii) A student investigates the rate of carbon dioxide production during exercise and at rest.

This is the equipment they use.

- four pieces of glass tubing
- two boiling tubes
- two rubber bungs
- mouthpiece
- limewater

Draw a diagram to show how the student should set up the equipment to carry out the investigation.

November 2021 Paper 1

Further practice · Attempt part a.i only.

5 The amount of carbon dioxide in inhaled air is different from the amount of carbon dioxide in exhaled air.

The diagram shows a piece of apparatus that can be used to investigate this difference.

(a) (i) Describe how this apparatus should be used to compare the amount of carbon dioxide in inhaled and exhaled air.

8. Question 1 · part c · 4 marks

June 2022 Paper 2R

Further practice · Attempt part c only.

1 A student investigates whether there is more carbon dioxide in expired air than in inspired air.

This is the apparatus the student uses.

The apparatus is not drawn to scale.
