Type MS · Identify reproductive organs from their roles or positions

Answer 1 of 8 · Question 1 part a · 7 marks

2025 JUN · Paper 02 · find part a in this mark scheme extract

1 (a)		• urethra; • testes; • uterus; • seminal vesicle; • vagina; • oviduct; • ovary;		7
(b)	(i)	• oxytocin causes uterus muscles to contract; • during childbirth/labour; • causes/stimulates lactation/release of milk; • emotional bonding;	Accept produced during sexual intercourse for mp4	3
	(ii)	• LH triggers ovulation/release of egg; maintains corpus luteum/ involved in production of progesterone;		2
				Total = 12

Answer 3 of 8 · Question 2 part a.i · 1 mark

2020 JAN · Paper 01 · find part a.i in this mark scheme extract

Question number					
2	(a)	(i)	**The only correct answer is A** *B is incorrect because it is the cervix* *C is incorrect because it is the oviduct* *D is incorrect because it is the uterus wall*		1
		(ii)	**The only correct answer is D** *A is incorrect because it is the vagina* *B is incorrect because it is the cervix* *C is incorrect because it is the oviduct*		1
		(iii)	• oestrogen (1) • lining (1) • ovulation (1)		3
	(b)		needed for the growth of bones (1)		1
	(c)		ref antibodies (passed to baby)/contains the correct balance of nutrients/reduced risk of diabetes/allergies/obesity later in life/reference to bonding between mother and baby (1)		1
	(d)	(i)	more breastfed babies in 2010 compared with 1940 (1)	Allow reverse argument A 78% vs 42% difference of 36%	1
		(ii)	• life expectancy shows a constant increase (1) • despite number of babies breastfed increasing and decreasing (1)		2

Type MS · Identify reproductive organs from their roles or positions

Answer 6 of 8 · Question 1 part whole · 6 marks

2023 JUN · Paper 02 · find part whole in this mark scheme extract

1	testis; oviduct; vagina; uterus; urethra; prostate;	Spelling must be correct	6

Question number	Answer	Notes	Marks

Type MS · Identify reproductive organs from their roles or positions

Answer 7 of 8 · Question 2 part a.i · 3 marks

2024 JUN · Paper 02 (regional R) · extract 1 of 2 · find part a.i in this mark scheme extract

2 (a) (i)

Part	Role		
	where sperm are deposited	where eggs are produced	where fertilisation takes place
fallopian tube			✓
ovary		✓	
vagina	✓		

one mark for each correct row

(3)

(ii)

- muscles/uterus wall contract;
- to widen/dilate cervix;

allow description of widening cervix

(2)

(iii)

C (a sperm cell fuses with an egg cell to form a zygote)

The following statements are incorrect because:

A haploid cells are not produced from fertilisation
B an embryo is not formed from fertilisation
D a baby is not formed at fertilisation

(1)

(iv)

luteinising hormone/LH;

(1)

Type MS · Identify reproductive organs from their roles or positions

Answer 7 of 8 · Question 2 part a.i · 3 marks

2024 JUN · Paper 02 (regional R) · extract 2 of 2 · find part a.i in this mark scheme extract

(b)	(i)		One mark for each diagram	(2)
	(ii)	mitosis → two cells, each with 23 chromosomes mitosis → four cells, each with 46 chromosomes meiosis → two cells, each with 46 chromosomes meiosis → four cells, each with 23 chromosomes	reject more than one line from each type of cell division	(2)

Total for Question 2 = 11 marks

Type MS · Identify reproductive organs from their roles or positions

Answer 8 of 8 · Question 1 part a · 6 marks

2024 NOV · Paper 02 · extract 1 of 2 · find part a in this mark scheme extract

1 (a)		• oviduct; • uterus; • ovary; • cervix; • progesterone; • oxytocin;		6
(b)	(i)	• condom/cap/diaphragm/femidom; • rhythm; • pill/ oestrogen and progesterone pill/progesterone pill;	Mp2- accept withdrawal	3
	(ii)	sterilisation/ IUD;	Accept vasectomy Accept tubal ligation	1
