Type MS · State the role of a named reproductive hormone

Answer 1 of 6 · Question 1 part b.ii · 2 marks

2025 JUN · Paper 02 · find part b.ii in this mark scheme extract

1 (a)		• urethra; • testes; • uterus; • seminal vesicle; • vagina; • oviduct; • ovary;		7
(b)	(i)	• oxytocin causes uterus muscles to contract; • during childbirth/labour; • causes/stimulates lactation/release of milk; • emotional bonding;	Accept produced during sexual intercourse for mp4	3
	(ii)	• LH triggers ovulation/release of egg; maintains corpus luteum/ involved in production of progesterone;		2
				Total = 12

Question number	Answer	Notes	Marks

Type MS · State the role of a named reproductive hormone

Answer 2 of 6 · Question 2 part a.iii · 3 marks

2020 JAN · Paper 01 · find part a.iii in this mark scheme extract

number				
2 (a)	(i)	**The only correct answer is A** *B is incorrect because it is the cervix* *C is incorrect because it is the oviduct* *D is incorrect because it is the uterus wall*		1
	(ii)	**The only correct answer is D** *A is incorrect because it is the vagina* *B is incorrect because it is the cervix* *C is incorrect because it is the oviduct*		1
	(iii)	• oestrogen (1) • lining (1) • ovulation (1)		3
(b)		needed for the growth of bones (1)		1
(c)		ref antibodies (passed to baby)/contains the correct balance of nutrients/reduced risk of diabetes/allergies/obesity later in life/reference to bonding between mother and baby (1)		1
(d)	(i)	more breastfed babies in 2010 compared with 1940 (1)	Allow reverse argument A 78% vs 42% difference of 36%	1
	(ii)	• life expectancy shows a constant increase (1) • despite number of babies breastfed increasing and decreasing (1)		2

Type MS · State the role of a named reproductive hormone

Answer 3 of 6 · Question 8 part a.i · 1 mark

2023 JAN · Paper 02 · extract 1 of 2 · find part a.i in this mark scheme extract

Number					
8	(a)	(i)	triggers ovulation/causes release of the egg;		1
		(ii)	Three from: • FSH stimulates growth/production of follicles in the ovary; • more eggs mature/produced; • increases the chances of more than one egg being released; • each egg is fertilised by a sperm;		3
	(b)	(i)	Three from: • placenta supplies glucose/oxygen from the mother; • twins have to share the supply of glucose/receive less glucose/oxygen; • less aerobic respiration; • less energy is released in the foetus and less growth occurs;	Allow nutrients for mp's 1 and 2	3
		(ii)	Two from • same egg and sperm used; • zygote splits/divides • forming 2 embryos;		2
	(c)	(i)	75th		1
		(ii)	• baby is weighed regularly; • growth should follow a percentile/graph/compare with (growth) chart/graph/compare mass to others of the same age; • detect if the baby gains or loses too much mass;		3

Pearson Education Limited. Registered company number 872828
with its registered office at 80 Strand, London, WC2R 0RL, United Kingdom

Type MS · State the role of a named reproductive hormone

Answer 4 of 6 · Question 6 part f · 1 mark

2023 JUN · Paper 02 (regional R) · find part f in this mark scheme extract

6 (a)	• fertilisation; • egg and sperm fuse/gametes/join;		2
(b)	Any four from • mitosis; • DNA is replicated; • chromosomes move to the centre of the cell; • chromosomes are separated to opposite poles; • cell divides;	Allow one mark for prophase, metaphase, anaphase, telophase in the correct order Allow zygote/embyro divides	4
(c)	**D;** (the cells are able to differentiate into any type of body cell)		1
(d)	• (corpus luteum) produces progesterone; • to maintain uterus lining;		2
(e)	Any two from: • umbilical cord established; • transports nutrients/named nutrients/oxygen (to fetus/embryo); • removes waste products/named waste product (from fetus/embryo);		2
(f)	development of male sexual characteristics/genitalia;		1
(g)	**C;** (release of oxytocin from the pituitary gland)		1
